At the heart of the **PhoCheck** is a highly sensitive patent pending photoionization detector (PID) with a dynamic detection range capable of 1 ppb up to 10,000 ppm, making it the only sensor on the market able to detect Volatile Organic Compounds (VOCs) at their very low ppb toxic thresholds and lower explosive limits.

The **PhoCheck Tiger** is the most advanced handheld photoionization detector (PID) with the widest measurement range on the market for volatile organic compounds (VOCs).
