

Drum & Tank Samplers

Pinpointer, Mucksucker and Dipstick Samplers

The Norwell Universal Drum and Tank samplers are designed for accurate and easy sampling of liquid and sludge from the most common sources - 55 gallon drums, truck and rail tank cars, large tanks, streams, lakes, rivers, and lagoons. They combine innovative features with interchangeable components for a system that is versatile and cost effective.

FEATURES

- **Three Sampling Devices for Diverse Applications** - Designed for specific applications in a variety of industries.
 - Dipstick* - a versatile tool for safe, easy sampling of liquids from virtually any source
 - Mucksucker* - designed for sampling high-viscosity fluids, sludge and mud.
 - Pinpointer* - allows samples to be drawn at a specific depth.
- **Ultrapure, Chemically Inert** - Constructed of chemically inert, 100 percent virgin Teflon® fluoropolymer resin, Norwell Universal Samplers minimize absorption and adsorption. All sampler surfaces resist corrosion and are non-leaching.
- **Interchangeable Components** - Norwell Universal Samplers enable the user to tailor the tool to specific applications, resulting in cleaner, faster, safer and more accurate sampling.
- **Translucent Body** - All sampling tubes are translucent, permitting a visual inspection of the contents. This visibility also helps the user to see immiscible layers and to determine the sludge depth in composite samples.
- **Safe, Tough Components** - Unlike glass, Norwell Universal Sampler components are virtually unbreakable. They are wear resistant and extremely durable, and can stand up to the toughest field use and handling.
- **Easy to Clean** - All removable and interchangeable components incorporate a unique, round inner thread design for easy cleaning.

Universal Sampler with Case

The kit comes complete with all three sampler products in the 40" size plus a Safety Opening Tool, a long coupling, a tube cleaning brush, and the Universal Sampler Case. The long coupling allows the user to join two sampler bodies together for a sampler that extends to 80".

Accessories

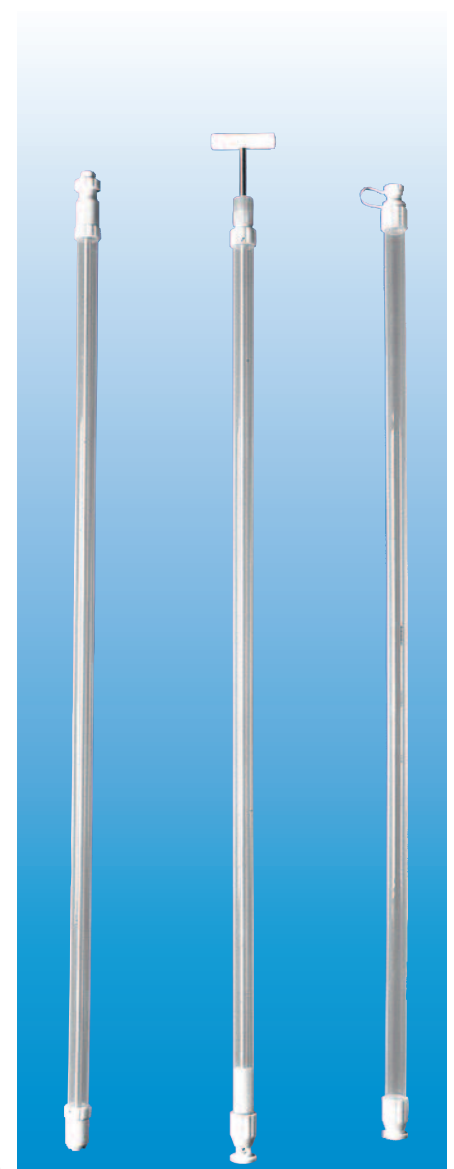

Push/Seal bottom assembly, Universal Sampler case, Tube cleaning brush, Brush handle extensions, Stainless steel safety opening tool, Long Coupling, and Teflon® sampling tube assemblies

Configurations

Complete Universal Sampler Kit with Case	
Pinpointer complete assembly	7' or 40"
Mucksucker complete assembly	7' or 40"
Dipstick complete assembly	7' or 40"
Disposable Dipstick (Polypropylene)	7' or 40"
Pinpointer bottom valve body	
Mucksucker piston assembly	7' or 40"
Mucksucker coring bottom	
Dipstick top assembly	
Universal sampler tube assembly	7'
Universal sampler tube assembly	40"

Materials

The Pinpointer and Mucksucker are only available in Teflon®. The Dipstick is available in both Teflon® (with interchangeable parts) and disposable polypropylene in a two piece only unit.

Pinpointer Mucksucker Dipstick
