Enviro Data is a flexible, easy-to-use program designed for managing and displaying site environmental data. It uses Microsoft® Access® as a front-end user interface and any ODBC-compliant database such as Access®, SQL Server® or Oracle® as a back-end database server. The open system based on industry standard software allows program modification for specific project requirements. It is available with Single Use or Concurrent Use licensing.

**FEATURES**

- Plan your sample events
- Manage field and lab data
- Track water, soil, air, etc.
- Centralize data storage
- Enforce data integrity
- Verification and validation
- Graphs and maps
- Reports and limits
- Access® front-end
- Access®, SQL Server®, or Oracle® data storage
- Inexpensive to buy
- Easy to learn and use
- Best support in the industry!

**Enviro Data®**

**BENEFITS**
- Save time and money
- Easy access to results
- Standardized output
- Improve project quality
- Better project decisions
- Happier clients and regulators!

**Validated Results (Test Site)**

# Site Environmental Data Management Software

## Enviro Data®

### SPECIFICATIONS

#### Ease of Use
- Familiar Microsoft® Access® interface
- On-screen tour to help you learn
- Logical menus and forms to guide you
- Based on years of client-driven development
- Open source so you can add features

#### Sample Planning
- Plan your sample events, including QC
- Create files for field data entry
- Print chains of custody
- Check for completeness

#### Data Import
- Multiple lab-friendly import formats
- Wizard-assisted import
- Field, geologic and engineering data
- Consistency checking during import
- Optional unit conversion during import or output
- Optional limit checking during import
- Parameter aliases – global or by site
- Default values for missing data
- Automated calculations during import
- Undo import feature (even years later)

#### Data Storage
- Access® .mdb file – stand-alone or shared
- Optional SQL Server® and Oracle® back-end
- Referential integrity enforced
- Handles duplicates and superseded values
- User-configurable parameters, flags, units, etc.

#### Data Export
- Access® databases and Excel® spreadsheets
- Highlight exceedences in Excel® spreadsheets
- Text and RTF files
- Formats for popular industry software
- Many regulatory formats including ERPIMS, SEDD, SCRIBE, etc.

#### Data Editing
- Editing forms for all data
- Find and replace for bulk changes
- Optional SQL query-based updates
- Automatically find and remove duplicated data

#### Quality Tracking
- Integrated validation and verification tools
- Stores both field and lab QC data
- Data review level tracking
- Integrated use of qualifier flags
- Activity log system for tracking imports and edits

#### Reporting
- Multiple standard report formats (50)
- Sophisticated cross-tab layouts
- User-specified formatting of results
- Comparison to multiple regulatory limits
- Flexible handling of non-detects and other flags
- Automated calculations in reports
- Users can create their own queries and reports

#### Graphing
- Time sequence graphs
- Automatic scaling
- Comparison to multiple regulatory limits
- Variable number of plots on a page

#### Map Displays
- Map display feature within the database
- Bubble maps with data posting
- Export to Surfer and other mapping programs
- Integration with ArcGIS and other GIS programs
- Integrates with Geotech's Enviro Space GIS plug-in

#### Statistical Analysis
- Multiple statistical reports
- Outlier comparison to historical period
- Charge balance and TDS calculations
- RPD and 95th percentile comparisons
