

Water Quality Meters

Oakton Waterproof Testr 11 Meters

Oakton Testr 11 meters are waterproof, pocket-sized meters used for measuring Electrical Conductivity (EC) or Total Dissolved Liquids (TDS) in water. Choose the standard dip-style for easy measuring or cup-style (Plus versions) for more accurate measuring. They have a Valox® housing and stainless steel electrodes for good chemical compatibility and durability. The sensors are field-replaceable, and you can re-use the meter body many times without losing waterproof and dustproof protection.

FEATURES

- Fast, reliable readings
- Easy push-button, one-point per range calibration
- Hold function freezes readings until user can log the measurement
- Self diagnostic error messages for low battery, over range or incorrect calibration.
- IP67-certified Waterproof/Dustproof, the housing floats!
- Auto-shutoff mode to conserve battery power
- Temperature measurement display
