

## Rotary Vane Systems

### DVT Rotary Vane Vacuum Pump Systems

Rotary vane vacuum pump systems are available in multiple configurations, such as stack-mounted, base-mounted, or tank-mounted units. DVT supplies NFPA 99 compliant medical packages for hospitals and laboratories as well as standard industrial packages in capacities ranging from 2.2 - 710 CFM per pump.

#### FEATURES

- Equipped with microprocessor, eliminating vacuum switches
- Multiple configurations for many industrial and medical applications
- By adding DVT vacuum boosters capacities can be extended to 5000 CFM.

Duplex tank-mounted rotary vane vacuum pump system for standard industrial applications

Duplex vertical tank-mounted rotary vane vacuum pump system, NFPA 99 compliant for medical applications
