

Pump Protectors

Coyote Pump Protectors, Single Phase

The Coyote Pump Protector protects pump motors by automatically shutting them off when they are at risk of low voltage, overload, rapid cycling, or running dry.

FEATURES

- Easy installation and set-up
- Automatically resets itself after dry run condition
- Protects both 2 and 3 wire motors from 1/3 to 2 hp
- Protects pumps by shutting them off due to: Failure to pump fluid due to gas or air lock, clogged inlet, or lack of fluid, low voltage, and rapid cycling overload.
- Restarts automatically with adjustable timer
- Weather-proof enclosure protects inside wiring from outside elements
- Exceptional flexibility
Operates alone, with pressure or float switches, or tank pump-up controls.
- Three phase models available upon request

MODELS

Four single phase models are available to suit your specific needs:

Super

- 115V 1/3-1 hp model
- 230V 1/3-2 hp model

Protects against running dry, low voltage or high voltage, overload, and rapid cycling. Also allows users to activate an alarm.

Basic

- 115V 1/3-1 hp model
- 230V 1/3-2 hp model

Protects against running dry and low voltage.
